

6-phytase

Hostazym[®] P-10 000 PF

Enzyme feed additive

COMPOSITION

An enzyme preparation of 6-phytase (IUB 3. 1.3.26.) produced by strain producer Pichia pastoris, having a minimum activity of 10 000 FTU/g.

INDICATIONS

Used as an additive in compound feedingstuffs rich in phytates such as feeds containing more than 40% of grain (corn, barley, oats, wheat, rye, triticale), oil-yielding cultures and legumes, in all species and categories of poultry and pigs with the purpose of degrading the phytate phosphorus and its subsequent digestion by the animals, as well as for improving the utilization of other nutrient substances, such as proteins, calcium, microelements and amino acids.

DIRECTIONS FOR USE

To be used orally after fully mixing with compound feedingstuff in following dosage:

Laying hens - 30 g/ton of feedingstuff.

Other animal species - 50 g/ton of feedingstuff.

WITHDRAWAL PERIOD None.

STORAGE CONDITIONS

To be stored in the original packaging, well closed, in a dry place at room temperature.

SAFETY RECOMMENDATIONS

Use personal protective clothing, rubber gloves and safety goggles.
